Descrizione

La VIA dei SANTI is proposed as a second "thorn" that, starting from the plain of Tanaro, in San Martino Alfieri, crosses through the Alfieri hills, in a **small but various territory**, which follows the routes of the **high hill** that runs parallel to the river, to descend, then, towards **the lowland** of San Damiano and, above all, towards the municipality of Tigliole. Here, there's a testimony of a particular **Romanesque style** as the Church of San Lorenzo, localized in a few hundred meters from an area that is rich of environmental characters, where LIPU has established its own **ornithological observatory**. Through the territory of Tigliole you can go to Baldichieri and you can take another interesting way called *La Via dell'Acqua*.

The Baldichieri station and the Triversa valley are crossed very fast, into a point with a strong infrastructure, which is immediately left behind to enter a particular and new environment, neighboring to **Valleandona and Valle Botto park**, joining the route of the Greenway, and to continue along these ridges to Monale and Cortandone. From here the itinerary joins the *Via dei Briganti*, to continue them, towards Montafia and Capriglio, until its

destination Don Bosco hill, in Castelnuovo.
