Descrizione

From the hamlet of Chiappera (1619 m) follow the paved road for a hundred meters to the Bastier wayside shrine, where you take the visible path on the right that, after a first flat stretch, becomes steeper and reaches firstly Pausa Grange and subsequently the Source of the Baciasset at a height of 2200 m. Here get past the fork on the right to Colle Sautron, and climb the path that reaches Passo della Cavalla, descends into the combe of the Munie lakes and finally reaches the Bonelli Bivouac and Apsoi lake. From here ignore the detour on the left and climb to Colle d'Enchiausa (2736 m) under the imposing north face of Mount Oronaye (3100 m). The descent along the valley of the same name passes the A.Valmaggia Bivouac and reaches the highest village of the valley of Unerzio, Viviere (1709 m).
